

Amendments to the Specification:

Please replace the paragraph beginning at page 16, line 28 and continuing to page 17, line 7, with the following rewritten paragraph:

The processor 38 directs that the sequence begins from the selected "WX" start position 124, wherein: a ~~second-first~~ object 106 falls from the "WX" position 124 and hits the peg 126~~ab~~g; changes direction and hits the peg 126~~fg~~h; changes direction, ~~skips a row of pegs~~ and hits the peg 126~~kt~~i; changes direction and hits the peg 126~~raa~~j; changes direction and hits the peg 126~~yhh~~k; changes direction and hits the peg 126~~eepp~~l; changes direction and hits the peg 126ll; and finally falls into the award position 132~~8~~9 having the ~~twentyfifty~~ value 142. The game provides the player ~~twentyfifty~~ awards as updated by the paid display 144 and subtracts one object 106 from the object meter 108. Here, the object 106 falls a relatively ~~small~~large horizontal distance from the "WX" position 124 to the award position 132~~8~~9, which is ~~possible but less more~~ likely than falling into the award positions ~~128, 134 and 130 through 136~~, as predicted by the laws of physics.
